

REQUEST AND RECOMMENDATION

ONE YEAR OPTION

600- 749 Clock Hour Program – Automotive Mechanics Technology

Background:

To provide another option for adult students to apply prior learning toward a degree, Ohio legislators established what has come to be known as the One-Year-Option through Section 363.120 House Bill 59 of the 130th General Assembly. The Chancellor of the Ohio Department of Higher Education, in consultation with the Superintendent of Public Instruction and the Governor's Office of Workforce Transformation, was tasked to establish a One-Year Option credit articulation system in which graduates of Ohio's adult career-technical institutions who complete a 900-hour program of study AND obtain an industry-recognized credential approved by the Chancellor will be able to receive 30 technical semester credit hours toward a technical degree upon enrollment in a public institution of higher education. The Chancellor was also to recommend a process to award proportional semester credit hours for adult career-technical institution students who complete a program of study between 600 and 899 hours AND obtain an industry-recognized credential approved by the Chancellor. The Chancellor convened a broad group of stakeholders to develop a system of articulation for the One Year Option that was presented in a report to the legislature called, *"Getting to 30: Establishing a One Year Option Credit Articulation System for Ohio."*

In order to implement the system of articulation developed with the stakeholders as well as address accreditation requirements for degree granting institutions, the Chancellor convened Credit Affirmation Teams (CATs) to conduct a peer review of programs and certifications for affirmation for a block of 30 semester hours of technical credit. The CATs were comprised of faculty and administrators from Ohio Technical Centers (OTCs) and an equal number from public degree granting colleges and universities in Ohio. The CATs were organized by four discipline clusters: Health and Allied Health, Building and Industrial Technology, Business and Information Technology, and Services. They were charged with reviewing the certifications and, if necessary, program content, to affirm that students completing the selected program at an Ohio Technical Center and earned approved certifications had demonstrated competencies equivalent to technical credit. CATs affirmed that programs over 900 hours, articulated to a block of 30 technical credit hours. For programs between 600-899 credit hours, the review resulted in a proportional amount of credit hours being awarded. This technical credit would then be granted, as a block, upon enrollment in a degree granting institution. Additional subject matter experts were consulted when core team members did not have sufficient content knowledge of the program being reviewed.

Recommendation

As detailed in the attached template, the Building and Industrial Technology Credit Affirmation Team recommends that students will be eligible for a block of 20 semester hours of technical credit towards an *Associate of Technical Studies in Building and Industrial Technology* when:

- the student has successfully completed a 600- 749 clock hour program in Automotive Mechanics Technology at an Ohio Technical Center.

And currently holds **FIVE** of the following credentials:

- ASE Student Exam: Engine Repair
- ASE Student Exam: Automatic Transmission and Transaxle
- ASE Student Exam: Manual Drive Train and Axles
- ASE Student Exam: Suspension and Steering
- ASE Student Exam: Brakes
- ASE Student Exam: Electronic/Electronic Systems
- ASE Student Exam: Heating and Air Conditioning
- ASE Student Exam: Engine Performance

And the following credential:

- OSHA 10 General Industry

Please note these certifications must be current and valid. If an individual's ASE Student Certifications have expired, the individual must have previously passed all of the student certifications and hold at least one current ASE technician certification (A1R-A8R) or an ASE Master Automobile Technician certification.

Certification Affirmation Template

The Program Affirmation Template is designed to provide a common matrix for a peer review process acceptable to the Higher Learning Commission to soundly affirm awarding technical credit for Ohio Technical Center graduates who are eligible for the One Year Option. The template should be completed for every program/subject and signed by the co-chairs of each of the four-cluster program areas for every Industry-recognized credential and program reviewed.

Please note: All Ohio Technical Centers must be accredited by one of the following: [Council on Occupational Education \(COE\)](#) and/or [Accrediting Commission of Career Schools and Colleges \(ACCSC\)](#).

Program Name: Automobile/Automotive Mechanics Technology/ Technician	Cluster <input type="checkbox"/> Business & Information Technologies <input type="checkbox"/> Health/Allied Health <input checked="" type="checkbox"/> Industrial Trades <input type="checkbox"/> Service Industries & Agriculture
CIP Code: 47.0604	
CIP CODE DEFINITION A program that prepares individuals to apply technical knowledge and skills to repair, service, and maintain all types of automobiles. Includes instruction in brake systems, electrical systems, engine performance, engine repair, suspension and steering, automatic and manual transmissions and drive trains, and heating and air condition systems.	
STEP ONE: CREDENTIAL REVIEW

<p>Program requirements by credentialing body.</p>	<p>Post-secondary entry-level automotive training programs may use the ASE Student Certification program, regardless of their accreditation status or involvement with ASE, AYES, NATEF, or Skills USA. The exams are available each fall and spring.</p>	<p>About the Exams: The ASE Student Certification program is specifically designed to evaluate and certify students who are near the end of their studies. The National Institute for Automotive Service Excellence (ASE) developed the exams in partnership with Automotive Youth Educational Systems (AYES), National Automotive Technicians Education Foundation (NATEF), and SkillsUSA. For more information about the ASE Student Certification program, including dates, testing details, scoring criteria, and more, please visit www.ASEStudentCertification.com.</p> <p>Renewal: Student certification is valid for two years from the date the exam was taken.</p> <p>Exam Integrity: All tests are administered at the school through a secure computer-based testing (CBT) platform delivered via the Internet. A proctor, who is a staff person other than an automotive instructor, enables the exam for students and monitors their test sessions.</p> <p>ASE Student exams are reviewed periodically and updated to maintain currency with NATEF Standards Releases.</p>
<p>Hour Requirements (includes any instructional, lab/practice hours, or internship hours).</p>	<p>All competencies must be covered. There are no work experience requirements for student certification; the student simply needs to pass one or more of the student certification exams. Upon successful completion of an exam, the school prints the certificate, has it signed for validation, and then awards it to the student.</p>	<p>Programs should align with the NATEF Standards but are not required to be accredited by NATEF. http://www.natef.org/NATEF/media/NATEFMedia/Accreditation/Accreditation%20Docs/2013%20Accreditation%20Docs/2013%20Auto%20Docs/2013-Auto-Program-Standards-w-Employability-Print-Version.pdf</p>

Competencies
demonstrated by
credential attainment.

Engine Repair

- General Engine Diagnosis; Removal and Reinstallation
- Cylinder Head and Valve Train Diagnosis and Repair
- Engine Block Assembly Diagnosis and Repair
- Lubrication and Cooling Systems Diagnosis and Repair
- General Knowledge

Automatic Transmission and Transaxle

- General Transmission and Transaxle Diagnosis
- In-Vehicle Transmission and Transaxle Repair
- Off-Vehicle Transmission and Transaxle Repair
- General Knowledge

Manual Drive Train and Axles

- General Drive Train Diagnosis
- Clutch Diagnosis and Repair
- Transmission/Transaxle Diagnosis and Repair
- Drive Shaft and Half Shaft, Universal and Constant-Velocity (CV) Joint Diagnosis and Repair
- Drive Axle Diagnosis and Repair
- Four-Wheel/All-Wheel Drive Component Diagnosis and Repair
- General

Suspension and Steering

- General Steering Systems Diagnosis and Repair
- Suspension Systems Diagnosis and Repair
- Wheel Alignment Diagnosis, Adjustment, and Repair
- Wheel and Tire Diagnosis and Repair

Brakes

- Hydraulic System Diagnosis and Repair
- Drum Brake Diagnosis and Repair
- Power Assist Units Diagnosis and Repair
- Miscellaneous (Wheel Bearing, Parking Brakes, Electrical, Etc.)

Electronic/Electronic Systems

- General Electrical System Diagnosis

One-Year Option
Certification Affirmation Template

- Battery Diagnosis and Repair
- Starting System, Diagnosis, and Repair
- Charging System, Diagnosis, and Repair
- Horn and Wiper/Washer Diagnosis and Repair
- Accessories Diagnosis and Repair
- Heating and Air Conditioning
 - A/C System Diagnosis and Repair
 - Refrigeration System Component Diagnosis and Repair
 - Heating, Ventilation, and Engine Cooling Systems Diagnosis and Repair
 - General Knowledge
- Engine Performance
 - General Engine Diagnosis
 - Computerized Engine Controls Diagnosis and Repair
 - Ignition System Diagnosis and Repair
 - Fuel, Air Induction, and Exhaust System Diagnosis and Repair
 - Emissions Control Systems Diagnosis and Repair
 - Engine Related Service

Rationale:

The Trades and Industry Credit Affirmation Team (CAT) utilized the following process to complete the assessment regarding the number of semester hours that would be awarded at the college level as block credit based on industry credential(s) plus 600-749 clock hours earned at an Ohio Technical Center (OTC).

- Research the competencies tested by the industry credential(s). The Trades and Industry CAT reviewed information about the industry credential(s) to determine the competencies signaled by earning the credential(s).
- Complete a nationwide internet search to review how other accredited colleges and universities are applying credit to ASE Student Certifications as a point of comparison. The Kansas Board of Regents has developed an articulation for ASE Student Certifications for college credit. Please see the below chart for credit awarded by the Kansas Board of Regents.

Certificate A “Common Courses” Automotive Service Technician Level 1

- ASE Student Brakes
- ASE Student Exam Electrical
- ASE Student Exam Engine Performance
- ASE Student Exam Suspension and Steering

Credit Earned: 12 credit hours

One-Year Option
Certification Affirmation Template

- Review OSHA 10-Hour Hazard Recognition Training for the General Industry. OSHA 10 includes content essential to general-related work such as fall protection, personal protective equipment, fire prevention and safety, OSHA inspection procedures and more.

The Trades and Industry CAT confirms:

- The certifications exams are valid, reliable and peer-reviewed on a regular basis to ensure the content accurately measures intended competencies.
- The ASE exams are administered through a secure process and delivered in a computer-based format to improve security and maintain currency of content.
- The competencies measured by the ASE exams are developed by industry and reflect industry standards.

The Trades and Industry CAT also considered competencies signaled by lab and practical learning experiences. As part of the program offered by OTCs, student will participate in lab/practical experience as recommended by the local program advisory committee to meet local business and industry needs. The lab/practical experiences will reinforce the instructional competencies through hands-on learning.

The eight modules included in NATEF were discussed, but the credit affirmation team determined that 600-749 clock hours would be insufficient to teach all eight modules. A longer clock hour program would likely consist of six or more modules. The team concurred that there was value in having lab/practical, internships and/or externships as part of the program to meet local industry/business needs.

Upon successful completion of the 600-749 hour program in the field of Automotive Technology at an OTC and meeting the below credentialing pathway:

- Students must obtain 5 of the following certifications:
 - ASE Student Exam: Engine Repair
 - ASE Student Exam: Automatic Transmission and Transaxle
 - ASE Student Exam: Manual Drive Train and Axles
 - ASE Student Exam: Suspension and Steering
 - ASE Student Exam: Brakes
 - ASE Student Exam: Electronic/Electronic Systems
 - ASE Student Exam: Heating and Air Conditioning
 - ASE Student Exam: Engine Performance
- AND the following certification:
 - OSHA 10 general industry certification

One-Year Option
Certification Affirmation Template

A student shall be awarded 20 technical semester hours towards completion of an Association of Technical Studies at a public degree granting college or university.

ONLY IF NECESSARY TO AFFIRM 20 CREDITS---STEP TWO: PROGRAM-RELATED COMPETENCIES OBTAINED OUTSIDE OF PRIMARY CREDENTIAL
